# Introduction

Our survey teams received a record number of responses over the course of their campaigns in the past months. Thanks to all who participated. Not only do all manner of PitchBook datasets improve via this kind of collaboration, but these tables also more accurately reflect which firms were most active in their particular arenas.

In this edition we also carried over our style of rankings, which should hopefully prove helpful for quick consultation. We endeavored to keep the extent of rankings equivalent per page, i.e. adopt a cutoff point of ranking every firm above 25th place, etc. However, spacing and aggregate tallies did prevent us from being able to adopt that cutoff for every single page, as you'll notice. All

in all, however, we are confident that the current tables will provide a useful, accurate snapshot of activity throughout 2018 by our array of typical criteria, from venture transactions by stage to European country.
