Developer of satellites specifically for monitoring and communication purposes. The company is developing systems to provide universal access to information about the changing earth, its environment and its people. It also utilizes aerospace technology and computer science for monitoring.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
San Francisco, CA	2010	$197.5	June 2013	$13.4	July 2015	$131.1	$1,006.0

Provider of a secondhand mobile marketplace designed to buy and sell locally. The company's platform uses artificial intelligence and image recognition capabilities enabling users to post items for sale in a few seconds by simply taking a photo.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
New York, NY	2015	$375.0	September 2015	$100.0	January 2017	$175.0	$1,000.0

Provider of online consumer lending services. The company provides a platform using algorithms and machine learning capabilities to provide a customized approach to the loan-application process.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
Chicago, IL	2012	$1,357	December 2012	$1.0	September 2015	$325.0	$2,000.0

Designer and manufacturer of self-driving vehicles and control systems. The company is developing fully automated, electric vehicle fleets and the supporting ecosystem required in order to provide mobility-as-a-service in urban environments.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
Menlo Park, CA	2014	$302.0	July 2016	$252.0	November 2016	$50.0	$1,550.0

Rokid

Developer of a smart home device featuring advanced artificial intelligence and deep learning. The company provides smart family technology that recognizes each user and adapts to pecific personalities and needs with its multi-dimensional voice and visual interaction abilities. It proactively delivers information and performs tasks for users through engaging two-way exchanges.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
San Francisco, CA	2014	$70.0	Janaury 2015	$20.0	October 2016	$50.0	$450.0

Developer of human-machine interaction technologies using artificial intelligence designed to develop speech recognition system, semantic analysis and vertical search technologies. The company's human-machine interaction technologies help in speech recognition as well as to build an independent vertical search technology to create a useful mobile user's search experience, enabling markets and businesses to understand, speak and also take initiative for personalized digital interaction.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
Beijing, China	2012	$268.7	October 2012	$1.6	April 2017	$180.0	N/A

Developer of cloud-based security software designed to detect mobile threats and improve mobile security. The company's cloud-based security software protects mobile phones from viruses, malware, spyware and has the ability to back up and restore data and tools to help locate lost or stolen phones by using machine intelligence to detect threats, enabling users to secure their personal information and data that are stored in mobile devices from serious cyber attacks.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
San Francisco, CA	2005	$330.7	December 2009	$5.5	February 2015	$200.7	$1,700.7
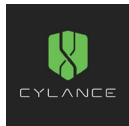

Provider of security software services. The company offers antivirus and endpoint protection services to detect and prevent malware invasion. It applies artificial intelligence, algorithmic science and machine learning to cyber security and improve the way companies, governments and end users proactively solve security problems.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
Irvine, CA	2012	$177.0	February 2013	$15.0	June 2016	$100.0	$1,000.0

Provider of drone delivery services for the healthcare industry. The company provides a robotic airplane service that carries vaccines, medicine, blood and medical supplies to hospitals and health centers.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
San Francisco, CA	2011	$43.3	December 2011	$1.0	November 2016	$25.0	$190.0

Provider of financial services that use machine learning and large-scale big data analysis for assessing credit risk. The company offers credit underwriting services that utilize big data analytics to help lenders make more accurate credit underwriting decisions. The company uses its technology to provide consumer loans.

Location	Year Founded	Capital Raised to Date ($M)	First Funding Date	First Funding Amount ($M)	Latest Funding Date	Latest Funding Amount ($M)	Latest Funding Post-Valuation ($M)
Los Angeles, CA	2009	$292.0	July 2011	$19.0	July 2013	$20.0	$159.7
