Introduction

Thank you to all who participated in the surveys that enable these rankings to be possible. Once again, near-record submissions led to this edition of the Global League Tables being released somewhat later in the quarter. As always at PitchBook, we prioritize accuracy above all else. We will continue to elect to provide the most precise information over speed until we are sure we can accomplish both.

In this edition, we carried over our style of rankings, which should prove helpful for quick consultation. We endeavored to keep the number of rankings equivalent per page (e.g. adopt a cutoff point of ranking every firm for each given section), however, spacing and aggregate tallies prevented us from adopting that cutoff consistently on every page. All in all, we are confident that the current tables will provide a useful, accurate snapshot of activity throughout 3Q 2019 by our array of typical criteria, from venture transactions by stage to US region.

Stay tuned for potential changes to these rankings as we continue to look for the most efficient and accurate way to showcase the most active firms across private markets.

Garrett James Black
Senior Manager, Custom Research & Publishing
